ENGINEERING THE STRUCTURES SINCE 1988

## **STRUCTURAL AND ENGINEERING CONSULTANTS**

[www.structuresindia.in](http://www.structuresindia.in)

We are committed to delivering services that meet both the technical and aesthetic aspects of a project, to the home-owner and their professional team.

# ▶ ABOUT STRUCTURES INDIA

At Structures India we are committed to delivering services that meet both the technical and aesthetic aspects of a project, to the home-owner and their professional team.

We provide a variety of services including structural design and advice, structural strengthening methods, Site structural Inspection, and structural engineering reports across India and Middle East.

Our structural engineers will be happy to attend site meetings and liaise with you and your team. With staff ranging from senior and chartered engineers to deal with challenging matters to the recently-qualified engineers for the smallest jobs to keep costs proportionate, SIC boasts over 30 + years' experience in the industry and competitive rates, so you can be sure that we have the skill and expertise to help you with your project.

# DR MOHIDEEN

With More than 58 years of Experience in the Structural Design Field, and with Doctorate from IIT Madras, he is well qualified to be proud founder and Principal of Structures India. His Teaching stint began in Research field in IIT Madras. Having worked in Riyadh and in many notable Indian Government projects, Dr Mohideen was well known for his vision of developing into a global leader in Engineering services. His

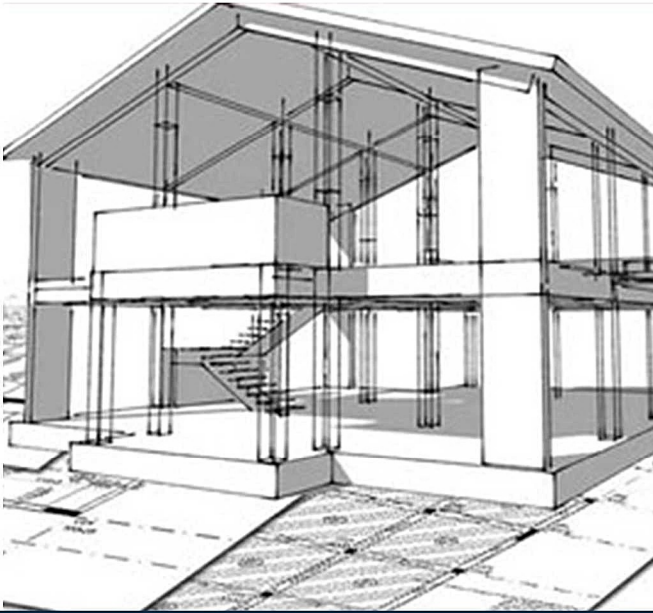

experience includes engineering, educational and healthcare institution, high-rise commercial buildings, governmental facilities, multi-story residential structures, Religious Buildings, industrial and environmental projects.

Ashiq Arif, managing partner and structural head of structures india is working to ensure the quality delivered to the clients. He has completed his bachelors from College of Engineering, Guindy, Chennai. He moved abroad to pursue his further studies. After completing his Masters in Structural Engineering from the University of Sheffield in London, UK he moved to the gulf to pursue his career. With 6 years of experience in the gulf working with various projects across the Middle East and few government projects alongside he has ensured that the quality of design and Detailing is always delivered to the client. He wants to take Structures india into the next leap of progress in further and development of the Organization. His Vision is to make Structures India a leading Consultant to the clients in the structural field, delivering a quality output in every way possible always.

# ASHIQ ARIF

## **STRUCTURAL DESIGN**

We have completed a wide array of assignments providing structural designs and design reviews for projects both local and international.

Structures India has worked alongside many leading architects to complete many projects under consultancy for structural designs.

## **TECHNICAL CONSULTANCY**

We provide a wide range of building consultancy services which include, value engineering, structural assessments of buildings, design reviews and structural advice for renovations and building remedial work, working closely with leading academics when required.

## **CONSTRUCTION SUPPORT**

We will be assisting site team and Client throughout a project in terms of all technical Engineering supports. Frequent site visits can be arrangement by our team to ensure the structural arrangement on site as per design calculations.
